

NORWEGIAN AS A 2ND LANGUAGE

The Norwegian school in London has Norwegian as the language of instruction and follows the Norwegian curricula. If students start at our school without sufficient Norwegian to follow lessons, we will assess the student's language skills in Norwegian, and based on this consider a referral to PPT Abroad in collaboration with parents. Pupils with insufficient Norwegian can receive a statement of special educational needs. They will receive extra support and follow their own plan in Norwegian (Individual education plan) until they can follow the ordinary teaching in Norwegian. In some cases, the student will receive extra support in other theory-heavy subjects.

Pupils learn Norwegian by being immersed in the language, and by hearing and using it in all contexts. We therefore depend on a close cooperation with the whole family so that Norwegian is also spoken at home.
